The Treasurers Almanacke,
OR
The Money-Master:

Wherein with necessary Tables of
Interest, the Lenders gaine, and borrowers
losse, of 10. 8. 7. 6. in the 100. are ea-
sily composd and demonstratd for the
Longitude and Latitude of all
places whatsoeuer.
1627.

Being most necessary and helpfull in
Coine, Value, Weight and Measure
of all things.

And properly Referred and Rectified

To the	{	Generall	Or	{	Nobleman
		Coronell			Commander
		Knight			Gentleman
		Merchant.			Mercer,
		Grocer			Draper
		Goldsmith			Fislimonger
		Seriuener			Vsurer
		Buyer			Seller
		Lender			Borrower
		Artificer			Clothier
Tradesman	Husbandman				

and whofoeuer else.

Also may fitly serue for the Sea.

God giues Art, let Men regard it.

The second Edition.

London, Printed for Michael Sparke. 1627.

A Table of good Husbandry: By which a man may know, how hee parts from his Meanes, and to thrive at the Yeares ende: In what his layings out or spending by the Day, Weeke, and Yeare, are mesured.

ende: In what his layings out or spending by the Day, Weeke, and Yeare, are mesured. Also by this a Generall may know how to maintaine an Army, a Merchant to discharge Sea busines & a Nobleman to measure his layings out, or expences to profit.

A Table

A Table of simple Interest, at 8. li. &c.

This Table, which needs no Description; first, readily sheweth the Interest of any Summe from 2 s. 6 d. to 900 li. for any time within a Yeare. Secondly, it is most vsfull and expedient for the casting vp of Interest arere, or behind, vpon forfeited Bonds, or accruing vpon scveral payments of money. Thirdly, is right necessary as well for the Borrower as the Lender, whereby the one may know how much Interest he should pay, and the other what to receine; and consequently neither of them doe, nor suffer iniury therein.

The benefit of the ensuing Table here layd open by these 3. Questions following.

- 1 TO know how much Money with the Interest, and Interest vpon interest, any summe of Money will amount vnto being put forth, or forborne for any number, or terme of yeares, not exceeding One and twenty.
- 2 To know how much any Rent or Annuitie will amount vnto, being forborne, or behinde; for any terme or number of yeares.
- 3 What any Rent or Annuity is worth in ready money, being to continue, or indure, for any terme, or time proposed.

All which are plainly exprest by diuers examples, in the next ensuing leaues.

To conclude, by the same Table you may value all Money, bargains for Lands, Leases, Annuities, Pensions, Rents in present possession, or in Reuerfion with other Contracts, by the Gain or Loss thereof, after the Rate of 8 li. per cent.

The same Table explained by example.

THIS Table as you see contains 4. Columes: The first towards the left hand is the number of Yeares, for which a summe of Money is Lent or Forborne, beginning at 1. and ending at 21. and noted at the top, *Yeares*.

The second Column shews how much Money ought to be receiued for 1 li. set at Interest, or forborne for any number of yeares vnder 21. And the third shewes how much must be receiued for 2 li. and so of the rest.

The Explanation and Answer to the former 3. Questions.

1 By the first Question is knowne how much Money, with the Interest, and interest vpon Interest, any summe of

The vse of the ensuing Table.

of money will amount vnto, being put forth, or forborne, for any number, or terme, of yeares.

As if it were required how much money ought there to be receiued for 1 *li.* at the ende of 7. Yeares set out at Interest vpon Interest.

First, I seeke out the principall in the head of the Table, to wit, 1 *li.* and secondly, the Yeares in the side of the Table, so right against this 7. yeares, and right vnder 1 *li.* I finde 1 *li.* 14 *s.* 2 *d.* and so much ought there to be receiued at the said end of 7 yeares.

In like manner, if 3 *li.* had bene set at Interest (for the said terme of 7 yeares. The Interest and principall of the said 3 *li.* would amount vnto 5 *li.* 2 *s.* 9 *d.*

Moreover if 50 *li.* were put at Interest for 12 yeares, according to the former directions I seeke 50 *li.* in the head of the Table, and 12 yeares in the side of the Table, so right against this 12, and directly vnder 50 *li.* I finde 125 *li.* 18 *s.* and so much doth the Interest, and principall of 50 *li.* amount vnto, being set at interest for 12 yeares. And thus of all others: Note that if the principall proposed bee not found in the head of the Table, take two Numbers there that will make it, and worke as before.

Secondly, by the second Question is known how much any Rent, or Annuitic will amount vnto being forborne, or behind, for any terme, or number of yeares.

As if you would know what 7 *li.* Annuitic, Rent, or Debt, being forborne, or behinde vnpaid for 5 yeares will amount vnto.

I first seeke out this principall 7 *li.* in the head of the Table, and vnto this 7 *li.* I add all the seuerall summes which stand against the first foure yeares, to wit— And it makes in all 41 *li.* 1 *s.* 2 *d.* And so much doth 7 *li.* Annuitic, or Rent amount vnto, accounting Interest

	7 <i>li.</i> 05 <i>o.</i> d.
}	7 11 2
	8 03 3
	8 16 3
	9 10 5
	41 01 2

vpon

The vse of the ensuing Table.

vpon Interest being forborne 5 yeares,

Moreover, if a Rent, or Payment of 40 *li.* be forborne for 5 yeares, and it were required how much there ought to be Receiued at the ende of that Terme: Vnto this 40 *li.* I adde all the seuerall

40 <i>li.</i> 05 <i>o.</i> d.	
summes, which are against the	
first foure yeares, to wit—	43 04 0
which makes in all 234 <i>li.</i> 13 <i>s.</i>	46 13 1
4 <i>d.</i> and so much ought there to	50 07 9
be receiued at the ende of 5	54 08 4
yeares: and so of any other, &c.	234 13 4

Note that if a Rent or annuitic bee not found in the head of the Table, as admit it were a Rent of 47 *li.* be hind for 5 yeares.

First I part it into two parts, which admit 40. and 7. Secondly, I seeke what 40 *li.* annuitic is worth, forborne 5 yeares, which according to the former direction would bee 234 *li.* 13 *s.* 4 *d.* the worth of that annuitic. Secondly I seeke in like manner 7 *li.* and finde it to bee 41 *li.* 1 *s.* 2 *d.* which two summes set together makes 275 *li.* 14 *s.* 6 *d.* and so much is 47 *li.* Rent, or annuitic being forborne 5 yeares, &c.

3 By the 3 question is knowne what any Rent or annuity is worth in ready money, being to continue, or endure for any time, or terme proposed.

As admit I haue a Rent, or yearely Pension of 7 *li.* per Annum, to endure for 5 yeares, and am desirous to sell it for ready money.

First, I seeke the worth of this yearely Receipt, or Rent for the said 5 yeares, according to the directions in the second Question, which I finde to be 41 *li.* 1 *s.* 2 *d.*

Secondly

The vse of the ensuing Table.

Secondly, right against the 5 yeares in the Table, I seeke for this 41 li. 1 s. 2 d. but finding it not, I take the next lesse summe against the said 5 yeares, which will be 29 li. 7 s. 8 d. and right ouer it in the head of the Table I see 20 li. which I note downe in a voyd place, and also the sayd 29 li. 7 s. 8 d. one against another, as here you see.

li. s. d.	
41 1 2	li. s. d.
Sub. 29 7 8	20 0 0
Rest 11 13 6	
Sub. 10 5 7	7 0 0
Rest 1 7 11	0 18 8
The value in ready money. 27 18 8	

Thirdly, I Subtract the said 29 li. 7 s. 8 d. from the afore-sayd 41 li. 1 s. 2 d. and there remains 11 li. 13 s. 6 d. which I seeke (or the neereit to it) likewise in the Table against the former 5 Yeares and finde neereit vnto it 10 li. 5 s. 7 d. and ouer it in the head of the Table 7 li. This 7 li. place downe also vnder the 20 li. and against the said 10 li. 5 s. 7 d. Now taking this 10 li. 5 s. 7 d. from the former remainder 11 li. 13 s. 6 d. there remains 1 li. 7 s. 11 d.

Lastly, I seeke this last remainder in the Table against the former 5 Yeares, and finde the neereit vnto it 1 l. 9 s. 3 d. and at the head of the Table 1 li. which is greater then the last Remainder 1 li. 7 s. 11 d. by 1 s. 4 d. Therefore it being taken from the said 1 li. in the head of the Table, there remains 18 s. 8 d. This being added vnto the former 20 l. and 7 l. makes in all 27 l. 18 s. 4 d. And so much is such a Rent, or yearly pension of 7 l. in ready money worth, to endure for 5. yeares to come.

Moreouer according to the same direction you shall finde that a Lease of 40 l. per Annum to endure for 5. yeares, to be sold presently for ready money, is worth 159 l. 16 s. 8 d. And so of all others in the like kinde.

By the same order you may know the increase of any summe, greater then is in the said Table.

The vse of the ensuing Table

Now for your better vnderstanding, and more copious vse of this Table, obserue the Examples following.

1. Example.

A. B. hath an annuity of 30 li. per Annum, to endure for 6 yeares, E. F. hath 26 l. cleare Rent, per Annum, payable for 9 yeares; now if you would know which of them is the better in value, and how mach, worke them both seuerally, as you are directed in the Rent or Annuity of 1 l. and as by the Operation hereafter set downe, appeareth. And you shal find the 30 l. Annuity to be worth 138 l. 13 s. 9 d. ob. and the 26 l. yearely Rent to be worth 162 l. 8 s. 7 d. So that if you deduct the Lesser from the Greater, it appeares that the Rent is better then the Annuity by 23 l. 14 s. 9 d. ob.

The Termes, with the Act, or Commencement dayes in both Vniuersities, Oxford and Cambridge.

Hillary Terme beginneth in both, January 14. and endeth at Oxford April 1. At Cambridge March 29.

Easter Terme begins in both, April 19, ends at Oxford May 25. At Cambridge Iuly the 4.

Trinity Terme begins at Oxford, Iune the 7, and ends the 6 of Iuly: But may be prorogued, ad magistrorum bene placitum.

Michaelmas Terme in both begins, October the 11. and ends December the 16.

Act of Bachilours in both, is the first day of Lent.

Act of Masters in Oxford, is Iuly the 8. In Cambridge Iuly the 3.

The

The Operation of the worth of 30 li. Annuity for 6 yeares

30 li. Annuity with the increase for 6 yeares	} li. s. d. q.	Summes to be disbursed
	} 220. 1. 5. 3.	
The summe next in value (which is vnder 100 li. Principall) to be subtracted from it —	} 158. 13. 8. 0	100 li.

The Remaine	— 1 1 10 3	
The Summe next in value aboue it (which is vnder 1 l. Principall) —	} 1 11 7 3	
Whereof 2 thirds are	— 1 1 1 0	13 s. 4 d.
The Remaine of 1 li. 1 s. 10 d. 3 q. the said thirds being subtracted. —	} 0 0 9 3	
For which being about the 41 part of 1 li. 11 s. 7 d. 3 q you may allow about the fortieth part of 1 li. viz.		5 d. ob.
		Totall, 138 li. 13 s. 9 d. ob.

2 Example.

An extort being sued fourth vpon a house and land for 50 li. debt, the same is to be rayted by 10 li. per Annum. Now the honor of the Premises desiring to buy out this with ready money: the question is, how much money will serue for that purpose.

A Table of compound Interest,

To resolve this Question, consider, that 50 *li.* will be payd in 5 yeares by 10 *li.* per *Annus*. Therefore you are to finde what 10 *li.* a yeare, for five yeares is worth in ready money; which if you follow my former direction, will appeare to be 39 *li.* 18 *s.* 5 *d.* and the same is the value of the Extent.

3. *Example.*

Inles Roe taketh a Lease for 15. yeares, at 9 *li.* yearely Rent, who after the expiration of 7 yeares, would pay a Fine, and bring downe the Rent to 6 *li.* per *ann.* for the residue of the terme.

To resolve this question, from 15 yeares abate 7. expired, and the time to come will be 8. yeares. Also deduct from the present Rent 3 *li.* and their remaineth 6 *li.* Therefore you are to finde what 3 *li.* Rent per *Ann* for 8 yeares is worth in ready money, which by persuing, my former directions will appeare to be 14 *li.* 9 *s.* 0 *b.*

3 Barly Cornes make an Inch, 12 Inches makes a foote, 3 foote to the yeard, 16 foote and a halfe make a Pole or Perch, this Perch in some places is 18 foote; in some places 21 foote; Of this 40 in length and 4 in breadrh makes an Acre of Land, or Roode, which is 125 paces to the Furlong, every Pace 5 foote: the foote is 4. pames and every pame 4 fingers breadth; a Fingers breadth is 4 Barly Cornes close together.

A Table of English miles.

Mile.	Furlong	Pearch.	Yard.	Foot.	Inch.
1	8	40	5 1/2	3	12
1	8	320	1760	5280	63360

The use of this Table.

First, a man may know how to take money vpon Rebatement after 8 in the hundred.

Secondly, any man that buyes or fels vpon time, may know how much he gaines by taking, and how much he looeth by giuing of time: and diuers other beneficiall vses appertaine to the same Table.

As for example.

If a Twelue months time be giuen for the payment of 400 l. and at the end of 6 Monthes, the Creditor desires to haue his money vpon Rebatement of 8 l. per 100 l. how much money must he receiue.

First, I seeke out in the side of the Table 400 l. and the 6 monthes in the head of the Table, and right against the said 400 l. and right vnder 6 monthes, I finde 15 l. 7 s. 8 d. 1 q. which must be rebated in the 400 l.

Secondly, I seeke in like manner for the rebatement of 60 li for 6 monthes, and finde it to be 2 l. 6 s. 1 d. 3 q. which with the former 15 l 7 s. 8 d. 1 q. makes 17 l. 13 s. 10 d. which being taken from the principall summe, to wit, 400 li. there will remaine 442 l. 6 s. 3 d. the summe of money that ought to be receiued, allowing 6 monthes rebatement according to 8 li. per cent. And thus of any other payment in the like kinde, &c.

Courteous Reader for thy better vnderstanding, in the Table of good Husbandry, Page 2. account from 1 li. to 1000 li. by the Weeke, and not by the Day: For if you count by the Day, 1 li. a Day is 565 li. a Yeare, and 1000 li. a Day is 365000. li. a Yeare and so of the Rest from 1 l. to a 1000. The

*A Table of the Standard of the true making of
Woollen Cloathes, according to weight and measure.*

1 Sacke of cleane Woole makes of Sorting Cloathes
4 Standard Cloathes.

Every Cloath weighes 60 li.
The length of every Cloath 24 yards of 6 quarters and a
halfe broad, or there abouts, with the Remedy or allow-
ance of 2 li. weight upon a Cloath.

Obserue in the weight to be well Scowred, Thicked,
Milled, and well Dryed,

Obserue in measure the } Yeard }
 } & } within the List.
 } Inch }

For breadth, and the rest, vse this Table, but alwayes ob-
serue the Weight is to be more regarded then the Mea-
sure, for the Measure is abused by stretching.

Kent, Yorke, & Reading Cloaths of 6 quarters and a halfe Broade.	{ weig. } Yeards. { 86 li. }	{ 30 & 34
