Guineas bought

Whereas the true lawful value of
 Guineas is fixed in the Silver Coin
 of these Realms ^{is} at the rate of 4 ounces
 1 dwt. 6 grains of Standard Silver for
 each Guinea, whether paid in Sappence,
 Shilling, Half Crown, or Crown, of which
 there are at present few in circulation,
 - I hereby declare that I will give in
 Bank Tokens the full value, benefit,
 profit & advantage, which a Guinea
 by its denomination imports; - that is,
 that I will give in Tokens 4 ounces,
 1 dwt. & 6 grains of Standard Silver
 for each Guinea.

Those who exchange their
 Guineas in terms of this proposal
 will get for every Guinea, 8 Bank
 Tokens & $\frac{1}{3}$ of a Token; - that is in

0070
Tokens the denominative value of 25.

This calculation is made on the supposition that the silver in Tokens from its inferiority in quantity of quality is about $1/5^{\text{th}}$ less than in Standard coin. — It would be 2^{d} so fraction more if accurately stated.
