No. I.

A STATEMENT of the Prices of MIDDLING WHEAT per Quarter, according to the Winchester Measure, also of the Quantities of all Grain Exported, with the Bounties paid thereon, and of the Quantities of all Grain Imported in each Year, from the Year 1697 to the Year 1799, both Years inclusive, divided into Periods: With an Account of the Excess of the Exports and Imports, on an Average, in each Period.

It has been thought right to bring into One View, a Statement of the CORN TRADE of this Kingdom, during the Whole of the present Century, from the best Documents that could be procured. The Account of the IMPORT and EXPORT of CORN of all Sorts to and from England, which is the most important Document of all, has been correctly kept in a Ledger at the Custom House of London, by the Inspector General of Imports and Exports. Many Parts of this Account of the Import and Export of Corn to and from England have, for different Periods, occasionally been printed by Order of one or other House of Parliament. The Office of Inspector General of Imports and Exports was not established till the Year 1697. No earlier complete Account could therefore be obtained than that of 1697. This Account, of course, commences from the Year 1697, inclusive, and is continued to the present Time.

In Scotland, a similar Ledger, or accurate Account of the Import and Export of Corn to and from that Kingdom, was not kept at the Custom House at Edinburgh before the Union, and for many Years after the Union, that is, till the Year 1755. From the Year 1755 a similar Ledger has been kept till the present Time; and the same Confidence may therefore be placed in the Official Accounts of the Imports and Exports of Corn to and from Scotland from the Year last-mentioned to the present Time, as in the Accounts of the Imports and Exports of Corn to and from England. To remedy the Deficiency in the Scotch Accounts of the Imports and Exports of Corn previous to the Year 1755, it has been found necessary to have Recourse to the Tables published in the Corn Tracts of Mr. Ditton, a Gentleman who took extraordinary Pains in collecting from the best Sources every Information of this Nature, and his Tables are generally supposed to contain the most accurate Account of the Imports and Exports of Corn to and from Scotland of any that have ever yet been published.

The Conversion of Wheaten Flour Imported and Exported, into Quarters of Wheat, has been made, by estimating Three Hundred Weight of Flour as equal to One Quarter of Wheat. This Practice has been followed since the Year 1771; but it is supposed that, previous to that Period, the Practice of converting Wheaten Flour into Wheat, at the Custom House, was by estimating Four Hundred Weight of Flour as equal to One Quarter of Wheat.

In stating the Quantity of Malt Imported or Exported, the Rule observed has been to estimate a Quarter of Malt as equal to a Quarter of Barley.

The Conversion of Oatmeal into Oats has been made according to a Rule laid down in the Corn Act of 1791, by multiplying the Number of Bolls of Oatmeal imported or exported by 140, which is supposed to be the Average Weight in Pounds Avoirdupois of a Boll of Oatmeal, and then by dividing the Sum so produced by 176, which is the Number of Pounds declared by that Act to be equal, on an Average, to Eight Bushels, or a Quarter of Oats.

The Statement of the BOUNTIES paid on Corn exported is taken from an Account furnished by the Receiver General of the Customs from the Year 1717 to the present Time. He has also furnished a like Account for the Years 1700 and 1701. But he alleges, that for the remaining Years from 1697 to 1717, there is no Official Account now remaining at the Custom House. The Accounts therefore of the Bounties paid in these deficient Years have been taken from the best printed Accounts now extant, which it is probable were copied originally from Custom House Accounts, which were then in Existence.

The Prices of Wheat in the first Column of this Statement are taken from the Audit Book of Eton College. These Prices are taken twice in each Year, that is, at Lully Day and Michaelmas, for the Purpose of ascertaining what is called The Corn Rent, by virtue of an Act passed in the 13 Eliz. Ch. vi. and according to the Rules prescribed in the said Act: But as the Windsor Measure was One-Ninth greater than the Winchester Measure, the Prices in this Statement have been reduced in Proportion. And as the Price of Wheat so taken and registered in the Audit Book of Eton College is of the best Wheat, a further Reduction has been made, to bring it to the Price of Middling Wheat, according to a Rule laid down by the late Mr. Smith, Author of the Corn Tracts, and adopted by J. J. Catherwood, the present Receiver of Corn Returns, with the Approbation of the late Mr. Whitbread. And in addition to this Table of Prices, founded on those kept in the Audit Book of Eton College, a further Account of the Prices of Middling Wheat from the Year 1771, inclusive, is given in an adjoining Column, according to the Returns made to the Receiver of Corn Returns from several Parts of the Kingdom, by virtue of Acts of Parliament, requiring the making of such Returns: from which a Weekly Table has been prepared, according to the Rules laid down in the said Acts, and published weekly in the London Gazette. An Opportunity is thus given of judging of the Accuracy of these Prices, by comparing them together.

This Flour is included in the Quarters of Wheat, and has been calculated upon the Principle before stated.

The AVERAGE PRICE of Middling British Wheat, taken from Mr. Catherwood's Tables, from the 26th September 1799, to the 26th September 1800,  
 In England, was - 106 s. 0 d. per Qr.  
 In Scotland - - 83. 4 d. —

The AVERAGE PRICE of Middling British Wheat, calculated from the Accounts kept in the Audit Book of Eton College, and taken at Lady Day and Michaelmas 1800, - - - - -  
 - - - - - was 112 s. 7 d. per Quar. Winch. Meaf.

N. B. The above Account will not be found to correspond exactly with the Quarterly Accounts, of the Importation of Wheat and Flour into England and Scotland, for the Reason assigned in a Note at the Bottom of the said Quarterly Accounts, marked Nos. VII. and VIII.

N. B. The Quantities of Grain imported by this Account, will be found to differ in some Instances from the Weekly Returns of Grain imported, already forwarded to the Privy Council. The Cause of this, as explained by the Officers at the Ports, is, that the Weekly Returns are made up from the Entries of the Merchants, and forwarded before the Officers can ascertain by the Discharge of the Vessel that the Quantities are correctly entered.

Custom House, Edinburgh, 25th October 1800.
